

Mission

The Container Approach

Why we were born and why we are different

- ✓ The container, which plays the leading role in the growth of a brand and increased distribution, will be the centre of project development to include unique equipment and applications, conveying systems, packaging centre, logistic handling.
- ✓ From conception to commissioning, ADvanced Container Handling with their manufacturing partner, will work with our customers to provide turnkey solutions with innovative configuration of conveying systems and packaging systems including taking care of all details which are sometimes deemed superfluous.
- ✓ The benefits for our customers will make the difference in acquiring new market positions in such a competitive world of packaging.

“The most important thing to you is the most important thing to us”

The Container Approach

✓ Advanced Container Handling will be able to offer through new solutions the following services:

- solving annoying existing problems
- more attention to the design as a strong point also creating bespoke solutions
- a close collaboration and sharing of information during each step of the project process

✓ Perhaps considered obvious, ACH are highly effective in the final purpose of the realization and operation of:

- complete lines and conveying systems
- palletizing and depalletizing solutions
- Customized/bespoke packaging systems
- Customized/bespoke handling solutions

✓ ACH, ADvanced Container Handling a reality, commit to utilizing their resources effectively and efficiently in applying ideas and conceptions for high-end lines and for new Robotized systems. all with that attention to the real protagonist your container, your business.

ACH, faces the global market of the different types of containers, offering the know-how necessary for the care in handling & packaging and making dedicated resources available to offer those solutions. This will result in not only the improvement in efficiency and ergonomics but also reduce those costs that penalize the recovery of investment in the short term.

A-C-H being able to operate in the various sectors, will make functional and quality solutions available, enhancing the handling and at the same time the image of the plant for the benefit of the end customer.
